** BELIZE. 24950 USB, Nov 27 at 2312, V31CQ, Scott contacting KQ4PCR. QRZ.com: ``V31CQ Belize flag Belize, Scott Davis, Blackman Eddy, Belize`` - sounds like an American; yes: home call is K5PS. Visits Belize in November, this year until 30th (Glenn Hauser, OK, WOR)

** BENIN. 1476 kHz, Monday November 25 at 0417 I`m on 1475 USB for any hint of TWR s/on sked for 0419 M-F - but no trace of it thru 0420 on my E/W loop. Later into Canary SDR, at 0426 it is audible with hymnusic, S9+5 vs HNL there (Glenn Hauser, OK, WOR)

** CANADA. 2749 USB, Nov 25 at 0302 UT, marine weather by autoYL voice JBA in French. Least prior skedstart is 0240 for 1.5 sesquikW VCS-21, Halifax NS, her last bc of the day, but not labeled as other than English by dxinfocentre.com/mb/htm -- I hope this ref be really more recent than the header date, 2020-05-13. Still need to find the official CCG site for such info. Nothing audible now on the further NF/NL area frequency 2598 where the least prior skedstart would have been 0207, so over by now (Glenn Hauser, OK, WOR)

** CANADA. 2749 USB, reply to my Halifax marine weather in French log: ``2749 kHz USB starting 0140 UT - Halifax Coast Guard Radio Station VCS in English. The station signed out 0155 UT and then a broadcast in French immediately followed at 0155 UT. Off by 0213 UTC. On again at 0240 UT. The English broadcast ended at 0253 UT with French immediately following. The signal slowly weakened during this broadcast and by the end at 0306 UT, it was down to S7.8 or so. The Canadian Coast Guard site schedule shows English followed by French for the 0140 and 0240 broadcasts - https://www.ccg-gcc.gc.ca/publications/mcts-sctm/ramn-arnm/part2-eng.html

Here's an interesting site on the station: http://www.coastalradio.org.uk/worldcoastal/halifaxpresent/halifaxpresent.htm Doug White, KA5ETS Carrboro, NC, Airspy HF+ Discovery with 53 ft vertical and thirty 25 ft radials`` on Nov 26 --- tnx, Doug!

2749 USB, Nov 26 at 0744 UT, YL with marine weather, English? This time at 0745, 2598 USB is also on and slightly stronger S7 = HNL, YL with marine weather, English. Too weak to get on two receivers to discern if //, but probably not. From CCG website above lots of info, except powers; do all these stay at same UT or make DST shifts?:

First 2749 bc of day is at 0740 from VCS Sydney NS via Port Caledonia, English followed by French at unspecified and probable variable time. Wikipedia: ``Port Caledonia is a small community in the Cape Breton Regional Municipality on the Donkin Highway, between the town of Glace Bay and the village of Donkin. It currently has one gas station / convenience store as well as a public beach, known as the Big Glace Bay Beach. The community received media attention in 2011 when resident Shirley Sampson appeared on the reality television program Canada's Worst Driver 7, ultimately being named the worst driver in Canada.``

First 2598 bc of day is at 0737 from Placentia NF MCTS/VCP via St. Lawrence, English only. This St. Lawrence town is at the southern tip of the Burin peninsula, not far from St. Pierre & Miquelon (Glenn Hauser, OK, WOR)

** CHINA [non]. 9790, Nov 25 at 0317, CRI relay via CUBA, S9+10 in English but modulation is suptorted; at least better than last night. Still here on A24 channel instead of 5910 for B24. Something`s always wrong at RadioCuba (Glenn Hauser, OK, WOR) see also CUBA below

** CUBA. 5025, Nov 23 at 0732, R. Rebelde back on with immediate ID

after missing several days, but weaker than before, only S9+20 vs noise level S9+15 (Glenn Hauser, OK, WOR)

** CUBA [non]. 5025, Nov 24 at 0322, R. Rebelde is gone again, no signal (Glenn Hauser, OK, WOR)

** CUBA. 15230, Nov 22 at 1544, open carrier S7/S8, presumably RHC trying to make a comeback. Previous bandscans for several days at various hours have not hit this. EiBi shows original usage was 23-06 & 12-16; the only other 15230 being V of Fano, clandestine Amharic for Ethiopia, via France at 17-18 Wed & Sat only. Aoki shows 23-05 & 11-15, no Fano. The only other RHC occasionally reported, early morning or evening, is 6000.

[But incredibly, Aoki still lists defunct WWRB on 15240 with R Munansi at 15-21! Like I wrote Sept 20, *2021*: ``BTW, would you believe that on 15240, Aoki is still listing R. Munansi, the clandestine for Uganda via WWRB? It`s been gone for more than three years``] (Glenn Hauser, OK, WOR)

** CUBA. 7330-7335-7340, Nov 24 at 0330, unusually wideband pulse jamming against nothing by the incompetent DentroCuban Jamming Command, since R. Martí is on 7355, and 7435 where no jamming is audible (Glenn Hauser, OK, WOR)

** CUBA. 9790, Nov 24 at 0335, S9+20/30 just barely modulated, must be the CRI relay which is supposed to be on 5910 in B24 as in HFCC and Aoki, but in EiBi truly on 9790. Something`s always wrong at RadioCuba (Glenn Hauser, OK, WOR) see also CHINA [non] above

** FRANCE. 6150, Nov 24 at 0327, song and cheers, S9+20/30; thought it might be Brazilian pirate R. Saturno, but at 03-05 it`s NHK World R. Japan relay toward ME, as well as 6105 Japanese at 02-04 for Central America - a worthy target unlike North America; are they // during the overlap hour? (Glenn Hauser, OK, WOR)

** JAMAICA. 28580 USB, Nov 25 at 2310, 6Y5CB, Jay in Montego Bay making quick contacts. Also noted Mexico, Belize, Uruguay sigs on 10m. QRZ.com: ``Causland J "Scorpio" Burnett,
Flower Hill, Salt Spring PO, Montego Bay, Jamaica`` (Glenn Hauser, OK, WOR)

** MEXICO. 660, Nov 23 at 0236 UT, ``660 AM y 98.1 FM ... sabemos cómo juega``. If KTNN is properly nulling toward NYC, 660 is open for DX, and this Spanish happens to be atop as I tuneby. Then commences research, as I am rather sure about ``98.1``. Could it be USA? No, the only USSS in NRC AM Log is lowpower in Oregon and also religious. However mwlist shows WDYZ Altamonte Springs FL is ``Poder 660``, but no connexion to 98.1; while NRC Log has that one with ESPN in English and FM on 105.5. Cuba has a Progreso on 660, and three unrelated FMs on 98.1. Surely this is Mexico, not Guatemala either where there is no 660.

The Mexicans usually or previously heard on 660 are XEEY, 50/10 kW in Aguascalientes; XEDTL, 50/10 kW in CDMX; and XEFZ, 10/1 kW in Monterrey, but there are a few others. So I search for a correlation with 98.1. WTFDA FM DB shows no 98.1 Mex relaying a 660. IRCA Mexican log has no 660/98.1 match, but digging deeper, in Quintana Roo there are sibling stations of same group, per own website https://sqcs.com.mx/radiochansantacruz/ -- altho not known to be simulcasting: 660 XECPR, Felipe Carillo Puerto, Radio Chan Santa Cruz; and 98.1 XHPYA-FM, Playa del Carmen, Riviera 98.1 FM. Monterrey and CDMX don`t have a 660/98.1 match. In Aguascalientes, XEEY`s FM is on 102.9; the 98.1 there is a separate station. So it looks like could be XECPR, in IRCA as 30 kW daypower, ``Radio Chan Santa Cruz, Frecuencia

Maya, Radio 660``. The ``sabemos cómo juega`` slogan implies a sports format. In IRCA the only one partially desportive is XEFZ. Perhaps more likely than QRoo is that one of the other three has had a realignment with a 98.1 since latest info in these references.

I ran the above by Tim Hall, who replied: ``Hi Glenn, I'm away from my notes all day visiting with family today, but offhand I suspect it's XEFZ ABC Deportes, which is // XHGBO-92.1. I think I may have recently heard that slogan myself. 73 Tim``

Well, I might have misheard ``ocho`` for ``dos``, leading me on such a wild goose chase? If not more monitoring of 660 direct, maybe would hear likewise on XEFZ webcast labeled ABC Deportes: https://gruporadioalegria.mx/#/
Finally: at 0013 Nov 24 on webcast, full ID including ``sabemos cómo se juega`` (Glenn Hauser, OK, WOR)

** MEXICO. Re my previous report of 660 XEFZ and FM 92.1 not 98.1, Tim Hall replies: ``I can definitely empathize with that. In heavy static, I have an odd propensity to mishear 2 as 6 and vice-versa. 73 Tim`` (Glenn Hauser, OK, WOR)

** MEXICO [and non]. 800, Nov 24 at 0345, KQCV OK is again getting hit by extreme distortion from XEERG, NL (Glenn Hauser, OK, WOR)

** MEXICO. Since I`m DXing at 0408+ UT Monday November 25, I tune around for the semi?-mandatory weekly government program `La Hora Nacional`. 6185 does not have same programming as several MW stations. I start with 1050 XEG and then check for //s. Sounds like same show with W&M conversation, but nothing synchronized! Does each station get a prefeed to play back individually, not really a network? Others 730, 900, 1670 == and 1570 XERF which I time running 50 seconds behind XEG, when there is an obvious shift from talk to music (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6930 AM, Nov 22 at 2313, pirate music S9+10, vs local noise level of S9/+10. Numerous logs here say it`s 77LJS on 6930 USB, with huge playlists: https://www.hfunderground.com/board/index.php/topic,137200.0.html
No one contradicts the initial heading as 6930 USB rather than AM (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, Nov 23 at 0738, Station YHWH running late again, JBA. Eric Fetters-Walp in WA reported him direct at 0405; Ron Howard was still hearing him at 0550 (Glenn Hauser, OK, WOR)

** OKLAHOMA. 267 kHz, Nov 25 at 0706 UT, JBA carrier, surely 25 watt ND beacon HET in HenryEtTa OK -- the only one on this frequency anywhere in the world per both RNA and dxinfocentre references. Right now not enough signal vs HNL and some local blob to copy the ID, but have succeeded many times before. Henryetta is S of Tulsa, E of OKC where US 75 intersects with I-40 (Glenn Hauser, OK, WOR)

** OKLAHOMA [and non]. 338 MCW kHz, Nov 23 at 1622, JBA carrier, most likely TU in Tulsa, rather than RYN Tucson which makes it at night. Vs constant high local noise level, only a few are detectable in daytime, such as Kansies on 332, 395, 407, Okies on 255, 515 - and yes, Enid`s EI is still OFF 341, forever? (Glenn Hauser, OK, WOR)

** OKLAHOMA [non]. 341 MCW kHz, Nov 26 at 0750 UT, JBA ND beacons mixing, inseparable, likely the pair I used to get even when EI was active: DNI Denison TX 25 watts, and OIN Oberlin KS 25 watts. RNA list says this about EI EnId: ``!! To be decommissioned 26Dec24 per OKLAHOMA NFDD 211 - 3 10/31/2024`` and last heard: 2024-09-05. I had also first noted it missing on Sept 6 (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 930, Nov 21 at 0225 UT, surprised to hear Spanish on what is surely WKY OKC, the normal dominator, and yes, DF points SSE toward it. Lots of crowd noise, apparently a stupid ballgame, occasional remarx but hard to understand as if talking to a companion rather than projecting as a broadcaster. Maybe it`s TV audio where the axion is conveyed mainly visually? PA in the background seems English. Not // 640 or 98.1 The Sports Animal, still in English. Remember that WKY previously had a Spanish stretch, music and DJs as ``La Indomable`` until it wasn`t, 2006-2017y per my archives. Makes `pausas` every so often, such as 0238, almost all filled by strings of PSAs in Spanish from ``Ad Council`` pronounced in English, e.g. marijuana. I`m trying to figure out what kind of SBG it be: big clue, mentions of ``canasta``,i.e. basket, and I also hear sounds of BKB bouncing on the floors, but never a mention of ``baloncesto`` -- too formal? At 0254 said there were 8:55 remaining. Seems to mention ``OKC Estandard[? - later, must have been trying to say ``Thunder``]`` several times. 0301 quick ID inserted by YL voice as ``WKY, Oklahoma City, una estación de ---?`` [Cumulus?] The call letters pronounced in English. Enough of that.

Circa 0400 I try the WKY webcast part of iHeart, linked from radio-locator, and now it`s back to English, ID for ``98.1 WWLS The Sports Animal``. Apparently WKY has no website of its own, rather directed to WWLS The Sports Animal where WKY is barely mentioned, and not a word in Spanish. But searching on that English word I get this: ``All Thunder games will air live on the Thunder Radio Network, led by WWLS (98.1 FM) The Sports Animal in Oklahoma City. All home games are also broadcast in Spanish on WKY (930 AM). Eleno Ornelas returns to broadcast all Thunder home games in Spanish.`` And season schedule shows at 7 PM today there was one vs POR. There is nothing in NRC AM Log about WKY being bilingual with SS. How long have these games been SS on WKY? What a comedown, for ``It is the oldest radio station in Oklahoma and among the oldest in the nation.`` See:
https://en.wikipedia.org/wiki/WKY
(Glenn Hauser, Enid, WORLD OF RADIO 2270)

** PUERTO RICO. 391 MCW kHz, Nov 24 at 0718 UT, ND beacon DDP is JBA, as occasionally makes it for real DX, listed 2 kW in RNA, 1 kW in dxinfocentre (Glenn Hauser, OK, WOR)

** SOLOMON ISLANDS. 5020, Nov 27 at 0737, JBA carrier. Cuba still off 5025. Presumably SIBC starting to show, late enough for nightprop from there and ``early`` enough for me to be tuning (GLenn Hauser, OK, WOR)

** SPAIN. 17755, Nov 21 at 1905, REE frequency for Africa is finally back on air, JBA into Maryland, but S7/S9 on 17754.991 into UTwente. 17715 & 12030 also audible at both; and 9690 for NAm is again INaudible at both. Something`s notright a Noblejas. I was checking 17755 again since JRX in Brasil first reported it at 1740 today. 17755 was last noted here Nov 8, and first noted missing on Nov 11. 9690 was also off again as of yesterday Nov 20 (Glenn Hauser, OK, WORLD OF RADIO 2270)

** SPAIN. 12030, Fri Nov 22 at 1609, only REE frequency audible at UTwente, no 17755; and of course, 9690 & 17715 to Hemisphere West not yet on air. However, first check earlier at 1547 did not hear any of them direct, not even 12030. By 2011, when all should be on, UTwente is getting 12030 & 17715 only. Something`s never nominal at Noblejas.

For token English Fri Nov 22 at 2300, direct check finds 9690 still OFF, 12030 S9/+10 > 17715 >> JBA carrier 17755. Preview feature to be about Spanish as a major language with 600 megaspeakers, and Spain`s future plans. 2301 news. 2310 SS language discussion underway. 2324

check into UTwente: 9690 off, and neither 17 audible, just 12030 poorly at S5/S6 (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Mon Nov 25 at 2259, REE S9+30/40 VG direct, sufficient on 12030, JBA on 17715 and JBA carrier on 17755. At least, all four transmitters manage to be on air merging into token English at 2300. Preview topic to be about role-playing video game designer and a literature festival, 2301 into news.

17715, Tue Nov 26 at 1958 direct, 2038 into UTwente, and 2040 into Maryland SDR, today`s missing REE frequency, but audible on 9690 & 12030, and JBA carrier on 17755. So now it`s the SAm transmitter off rather than 17755 or 9690 (Glenn Hauser, OK, WOR)

** SPAIN. 9690, 12030, 17715, 17755, Nov 27 at 2057 check direct, all four REE frequencies are on, in decreasing order of strength here. Likewise for token English from 2300 Wednesday, previewing topix about a book on Black Friday objects, and about Beethoven, S9+40/50. 2302 news leading with Israel/Lebanon ceasefire (Glenn Hauser, OK, WOR)

** TURKEY [non]. 5960, Fri Nov 22 at 2258 NO signal direct from VOT English, but algo on 9610, likewise at 2309. UTwente at 2323 gets Chinese only on 5960 and Mongolian? only on 9610. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 5960.004-, Nov 23 at 2304, VOT not off the air, olds in English underway, S9/+10 into UTwente with humbuzz and 6CI underneath. After music break, 2325 `Turkey`s Geomarked Products` about spinach & meatballs, over already at 2327 music. 2351 multi-lingual ID filler reel. 2354 s/off as if 1330 on 13635: something`s always awry at Ankara. 2354.6 IS briefly and off just before 2355* uncovering Chinese (Glenn Hauser, OK, WOR)

** TURKEY. 9610, Nov 24 at 2130, VOT English insufficient into UTwente, so will get the next broadcast:

5960.003-, Sunday Nov 24 at 2300, VOT English, S9+25/35 into UTwente with some hum and more CCCCCCI than usual, but doubtless far better than would have been direct, not even checked. S/on by Efsun the axentuated, and she into olds I do not try to perceive. 2317 multi-lingual ID filler reel. 2319 It`s Teachers` Day in Turkey. 2320 `Weekly Analysis` by some Prof. Dr. at a Foundation whose names I can never copy, about prospects for the next 4 years of *rump. [why does everyone assume 4 years? He`s rather old with lots of enemies, obviously in mental decline, and OTOH, he said no further elexions would be needed, since by 2029 he`ll be dictator for the rest of his life, if any]. Says Pete is a devout Zionist; Marco is pro-Israel with no foreign-policy experience, etc.

2321 `Letterbox` with the other YL who has done it a couple times before, Sylvia? She`s all pro-forma with very quick shoutouts, acknowleding reception dates, promising QSLs and greetings; not dealing with anything substantial such as questions. No problem with an accent, but rapid speech of unfamiliar names along with fading and ChiCom QRM makes it hard to get names, or even be sure of which countries are called. 1) ??. 2) Pakistan? 3) W Bengal. 4) Port Alberni, Canada. 5) Oslo, Norway. 2331 song break padding. 2335, 6) India. 7) China. 8) India? Then about Nov 24 being Teachers` Day, with dedications, song. 2343 outro and `L`box` theme. How lame to pad with music, not even requested, during a mailbag show. Not enough incoming correspondence? 2344 music and moremusic. 2253 s/off as if the 1330: something`s always awry at Ankara. 2354 IS to 2355* uncovering the Chinese (Glenn Hauser, OK, WOR)

** TURKEY. 5960.003, Nov 25 at 2258, VOT not off the air, IS & ID in

English, S9+10/20 direct but insufficient vs local noise level. 2331 into UTwente when measured, S9+45 with music and more music. 2352 headlines by Efsun. 2353 s/off as if 1330 on 13635: something`s always awry at Ankara, bit of IS to off before 2355* (Glenn Hauser, OK, WOR)

** TURKEY [non]. 5960, Nov 26 at 2300 and later chex, no signal from VOT English to N America; 9610 algo JBA. Into UTwente at 2331, Chinese only on 5960, non-English JBA on 9610, presumably Mongolian from China. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 5960.004-, Nov 27 at 2259, VOT not off the air, S9+10 direct but same as noise level so insufficient. 2323 into UTwente when measured, S9+35/45, Efsun concluding `Unexpected Twists of Fate`. 2330 next check one of their commentaries about US elexion. 2340 music. 2345 `Sports Panorama`. 2352 multi-lingual ID filler reel starts but cut short rather than entire biminute. 2353 s/off and IS to 2357.6* uncovering Chinese (Glenn Hauser, OK, WOR)

** U S A. 344 MCW kHz, Nov 26 at 0751 UT, ND beacon is JBA, seems to be OL - but nonesuch listed: likely JL, i.e. I missed the initial dot, `Lunns` Joplin MO per RNA list last logged 2024-11-12, power 0, apparently meaning unknown. I`ve heard it before (Glenn Hauser, OK, WOR)

** U S A. 6501 USB, Nov 25 at 0310, marine weather JBA. EiBi shows USCG timeshares by Guam, Kodiak, Honolulu, Chesapeake, but none at this exact time (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: confirmed UT Thursday November 21 at 0130 on WRMI 5010, S6/S7 into Brasil SDR with storm crashes and some flutter.

Also confirmed Thursday November 21 at 1730 on SW Radio, Germany, 3975.002, S9+5/10 into UTwente.

WORLD OF RADIO 2270 contents: Alaska, Australia, Austria and non, (Bulgaria), Canada, China, Cuba, Europe, (France), Germany, Guam, India, Japan, Kaliningrad?, Kurdistan non, México, Myanmar and non, (Norfolk Island), North America, Oklahoma, (Philippines), (Romania), Russia, Spain, Sri Lanka, Taiwan, Turkey, UK and non, USA and non, (Uzbekistan), Vanuatu; propagation outlook - (countries mentioned along with others not in order)

Full schedule: http://www.worldofradio.com/radioskd.html

WORLD OF RADIO 2270 monitoring: confirmed Friday November 22 at 1300,
first airing on WRMI 15770, S9+5 direct.

Also confirmed Friday November 22 at 2130 on IRRS via AM Italia,
1322.998- kHz, S9/S7 with fades into UTwente across Europe. Wavescan
finished by 2129, but then a few sex of Amy Goodman finishing
`Democracy Now!` which was otherwise blotted. It`s well worth hearing
at least on NAm stations.
https://www.democracynow.org/stations
or podcasts:
https://www.democracynow.org/
It`s not on a single radio station in OK - Democracy Not Now! but on
some cable TV and indeed lots of CTV listings around world. Not listed
for Italy - IRRS. Nor is it anywhere on the NEXUS-IBA program
schedules - but it might be among numerous unspecified but filler
shows.

WOR 2270 also confirmed Friday November 22 at 2300 on WRMI 9955,
S9+20/30 direct but as usual on this transmitter, undermodulated.

Also confirmed Friday November 22 at 2330 on SW Radio, Germany,
3975.003, S7/S8 into UTwente. Next -- except 5085 is not on air at
0232 & 0305 chex:

0400 UT Saturday WTWW 5085;
0930 UT Saturday WRMI 9455 to WNW [has been off air; or 7730];
1530 UT Saturday SW Radio, Germany 6160;
1830 UT Saturday SW Radio, Germany 3975;
2030vUT Saturday WA0RCR 1860-AM [2000/2200];
0000 UT Sunday WTWW 9475 [suspended];
0100 UT Sunday WRMI 9955 to SSE [also web-, phonecast; jammed?];
0330vUT Sunday WA0RCR 1860-AM [nominal 0415; as late as 0600];

2000 UT Sunday IRRS 1323-Italy;

** U S A [and non]. WORLD OF RADIO 2270 monitoring: confirmed Monday November 25 at 2030 on SW Radio, Germany, 3975.002+, S8/9+5 into UTwente.

Also confirmed UT Tuesday November 26 at 0353 the 0330 on WRMI 7780, S8/S9 direct.

Barely confirmed Tueday November 26 at 1415 and 1520 the 1400 & 1500 on WRMI 9955, JBA direct as usual this time of day, but sounds like me. I`m barely awake, so no checking remotes or webcast.

Also confirmed Tuesday November 26 at 2100 on IRRS SW via AM Italia, 1322.997+, S9 into UTwente. Next:

0030 UT Wednesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2270 monitoring: confirmed UT Wednesday November 27 at 0030 on SW Radio, Germany, 3975.003-, S8/9+10 into UTwente.

Also confirmed UT Wednesday November 27 at 0030 on WRMI 9395, S9+10/20 into Peoria.

``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard's listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees. Hello Glenn: WRMI, World of Radio #2270, congratulations, Happy Thanksgiving Day, USA. 9395 kHz, QRN, 0045 ID heard, 0031, 0044, 0058 (55433-4), (55434), 0059, November 27 UTC 2024 [Wed] (Lemke, Richard -AB)``

Also confirmed Wednesday November 27 at 2030 on SW Radio, Germany, 3975.003-, S8/S9 into UTwente, but JBA with theme recognizable. MUF must be way down as sig is normally good there.

Also confirmed Wednesday November 27 at 2200 on WBCQ, 7489.95 approx., VP signal direct but at least somewhat propagating in wintry conditions. Next:

0130 UT Thursday WRMI 5010 to S; {confirmed}
1730 UT Thursday SW Radio, Germany 3975.

Glenn Hauser, P O Box 1684, Enid OK 73702
(Glenn Hauser, OK, WOR)

** U S A. 5085, Nov 24 at 0322, WTWW-2 back on air after absent last night; along with spurs circa 5072 & 5098 (Glenn Hauser, OK, WOR)

** U S A. WTWW: ``Glenn, #2 transmitter would not come on this Friday, because of low water level. A small leak not found yet but might be in the heat exchanger. John McClintock will open up the exchanger shortly and look to see if there is a leak in there. George McClintock 11-24-2024`` --- 5085 is on the air at 0154 check Nov 25 (Glenn Hauser, WOR)

** U S A. 5130 -57 Hz = 5129.943, UT Sat Nov 23 at 0055, this WBCQ is on for a change, with IS & ID prélude, S9+5/10 into Maryland SDR; 0100 ``Radio *rump International on Radio Angela``, dead air, join WTO late, as meanwhile I have retuned to 7490 -65 Hz = 7489.935 at S9+15/20 where `AAAWWW` is underway. Earlier, and still, 3265 not on, and 6160 -69 Hz = 6159.931 at S3/S6 as usual with something else. Apparent new live episode. Extols real radio vs digital stuff, and single word exclamation toward end of theme sounds like ``cathode``. 0103 A&A are together in Deland of Fla where it`s cold -- only 50 degrees. Laments that his hometown station as a kid, WFAS 1230, White Plains NY, has surrendered its license after a few years of digital-only, which no one could be listening to. 0108 dead air, or rather transmission break for less than a minute as a gap in the waterfall. Plugs transmitters available, needs more business for WBCQ.

The 500 kW leased to WLCR is a Continental 420D. 0141 a new Free Radio Weekly has just come in, so reads some logs from that until 0148, just names of pirates, frequency, maybe a bit about programming, no dates, times, or credits: including something on ``9635`` which was likely a typo for 6935; and on 7475 YHWH - my log - which he calls ``religious`` - well, yes, but the point is that it`s anti-Christ as I always denominate it. 0150 reading some emails, with blessedly few political comments. Prayer and again runs over into Hal Turner JIP about 0201. Then I check 5130- where the air is dead again, until the standard canned sign-off at 0202 until 0203.6* (Glenn Hauser, OK, WOR)

** U S A. 7490-, Nov 25 at 0314, WBCQ with S9+30 of dead air. BTW, on `AAAWWW`, 9330 transmitter is referred to as WBCQ-6, but I never hear numbers assigned to any of the others. What are they? Which is which? (Glenn Hauser, OK, WOR)

** U S A. 9955, Nov 25 at 0319, this WRMI is JBM with music. At best it is merely undermodulated. Can anyone measure the percentages? (Glenn Hauser, OK, WOR)

** U S A. 4840, UT Sun Nov 24 at 0414, after `Ask WWCR`, promo for TWR gethoperadio.com, 0415 horrible off-key hymnsing instead of 4-year delayed DX olds by Bob Padula (GLenn Hauser, OK, WOR)

** U S A. 15240, defunct WWRB: see CUBA 15230

** U S A. 23250, Nov 27 at 1855, extremely distorted but strong talk, S9+10 into Duryea PA KiwiSDR. 1858 WITK ID and Town Hall News. Checking this because Hugh Whelan reported an unlisted station on 4650, which Arthur Pozner then IDed as WITK [not WIZK my typo], Wilkes-Barre PA on its 3rd harmonic of 1550! as heard into same Duryea remote, which is only about 10 miles away. Looking at the waterfall, there are lines throughout the spectrum at least to 31 MHz, correlating with 1.55 MHz spacing, so I pick this frequency which is the *15th* harmonic of 1550. Have not tried direct, but may well be propagating widely on multiple harmonix. Also heard on many of the lower ones spot checked. I`ll calculate them for convenience: 3100, 4650, 6200, 7750, 9300, 10850, 12400, 13950, 15500, 17050, 18600, 20150, 21700, 23250, 24800, 26350, 27900, 29450, 31000...

Not until 2303 do I get around to checking many of those direct: nothing except a JBA carrier on 9300 which is probably ChiCom jamming against Sound of Hope. WITK, in Pittston PA, not Wilx-Barre, per NRC AM Log, U4 10000/500 watts so by then would have powered down with different antenna pattern. Still worth checking some of those possible harmonix in daytime. Hugh`s original report started, ``From West Pittston, PA I heard a strong signal at frequency 4650 of a man preaching at 14:16 UTC, later followed by a clear ID that this was coming from the Wilkins Radio Network.`` It`s not clear if Hugh was *in* West Pittston PA, was using a remote somewhere, or heard it direct at his location of record, Ft Myers FL; which? W. Pittston is even closer to Duryea, both NE of W-B. NRC shows licensed to Pittston, not West Pittston, and address in Exeter. Pittston, West Pittston, Exeter and Duryea are close to each other about halfway between Scranton and W-B, slightly closer to the latter. Radio-locator gives station address as Wilkins R Network, Spartanburg SC, so O&O? Day and night transmitter locations are slightly different by one second of latitude (Glenn Hauser, OK, WOR)

{later: Hugh says he was in W Pittston. So a local-overload situation but some harmonix still might escape}

** U S A. 770, Nov 22 at 0734 UT, `Red Eye Radio` promos, then KKOB ID plugging streaming. WABC can sometimes be heard but not now. I guess

KKOB, ABQ NM, still on 12.5 kW ND STA. How`s replacing the ballooned tower coming along? Is KKOB still running the co-channel 230-watt Santa Fe relay at night, or no longer necessary? Are there any other such arrangements on AM? WBZ 1030 used to have a WBZA in Springfield MA (Glenn Hauser, OK, WOR)

** U S A. 880 kHz, Nov 25 at 0407 UT, Spanish ID as ``Radio Visión Latina, 106.1 FM`` and canciones. Best on N/S antenna, while on E/W there is NYC QRM. Only one XE on 880 and it`s silent! There are several USSS on 880, but this must be U4 10/1 kW KJOZ Conroe TX, but for Houston market, in NRC AM Log with different slogan ``La Calle`` group, address in Pasadena, tropical format. That group is/was KJOZ plus three FM translators on different frequencies. However, WTFDA FMDB on 106.1 leads to K291CE relaying KJOZ 880 with 28/28 watts, ``Radio Vida Visión``. Broad search on ``Vision Latina 106.1`` also leads to Houston but with precious little detail, not even a callsign at https://visionlatina.com/ website. Apparently a TV group in a few major cities with radio as an afterthought (Glenn Hauser, OK, WOR)

** U S A. 880, reply to my KJOZ log: ``Glenn, you are correct about Radio Visión Latina on KJOZ 880, which is the originating station for K291CE 106.1 in Houston. KJOZ has been leased by numerous programmers in recent years, so sometimes hard to keep track of changes. La Calle is a different format currently heard on several translators and LPFMs on 102.5 in the greater Houston metro area. Stephen Luce, Houston, Texas`` --- tnx, Stephen! (Glenn Hauser, OK, WOR)

** U S A. 1600, Nov 26 at 0443 UT, ``BIN 103.7`` non-ID at tuneby. I would expect usual dominant KATZ St Louis. NRC AM Log shows 6/3.5 kW station is UC:GOS but also with BIN and translator on 93.3. Website https://hallelujah1600.iheart.com/ has nothing about BIN or even callsign--who needs them? KATZ. The only 1600/103.7 matchup in WTFDA FMDB is W279BY of WKZK 1600, Augusta-Richmond County, GA, ``The Spirit 103.7 FM & 1600 AM`` AND same match in NRC AM Log as WKZK North Augusta SC, 4000/27 watts also UC:GOS format, but no mention of BIN. The only other BIN on 1600 is 25/5 kW WWRL NYC which is apparently fulltime BIN with UC:NWS/TLK, but I would hardly expect it way out here, https://newyork.binnews.com/ and no FM.

Looking further into WKZK: https://wkzk.net/ shows slogan is The Spirit, and nothing about BIN - might take news only from it, but would not expect that to combine with 103.7 in a non-ID. Now what?

Guess what, searching on BIN 103.7 leads right to St. Louis! About the same generic website as WWRL: but nothing about 1600! Back to WTFDA: there is no 103.7 in MO near St Louis: I bet it`s across the bridge in IL: YES, here we go: ``W279AQ relay of: KLOU 103.3 HD2 103.7 MASCOUTAH IL USA 0.25 0.25 0.0 0.0 38-34-28 90-19-32 D3FF NEWS BIN 151819`` --- Mascoutah is just SE of St Louis, about twice as far out at Belleville, rather too far for an FM translator into STL, but not for 1600 AM. O, CoL may be Mascoutah, why? but coverage area shows site is on SW edge of St Louis in MO, with poor little Mascoutah barely within fringe contour:
https://radio-locator.com/cgi-bin/pat?call=W279AQ&service=FX
How convoluted! (Glenn Hauser, OK, WOR)

** U S A. 1680, Nov 21 at 0755, ``Classic Country 91.7``. Got to be either KRJO Monroe LA or WPRR Ada MI. NRC AM Log shows for KRJO: ``99.7 The Legend``, of course a mere translator, K259CU. Search does lead to this: ``99.7 The Legend Monroe's Classic Country``, and certainly no fit for WPRR (Glenn Hauser, OK, WOR)

** VENEZOMBIA. 4940, Nov 23 at 0730 no signal from the 4940 station, nor 24 hours earlier but usually on overnight. Also missing earlier evening Nov 23. Some report this as VENEZUELA, others as COLOMBIA. I

think V more likely (Glenn Hauser, OK, WOR)

** VENEZOMBIA [non]. 4940, Nov 24 at 0321, 4940 station still missing, no signal direct (Glenn Hauser, OK, WOR)

** VENEZUELA. 4940, Nov 26 at 0744, JBA carrier indicating 4940 station back on air after missing a few days. Was previously reported the night before:
``Estación 4940 on at 0735 UTC Nov. 25 --- There were some reports this station was missing in recent days, but it's on tonight. During a band scan here near Seattle, I immediately heard music on 4940 kHz -- first a woman singing nearly operatically at times in a Latin-American song at 0735 UTC, a male announcer talking in Spanish for a moment or two, then (a bit surprisingly) a male-sung contemporary Christian song called "I Will Rise" at 0741 UTC. What I was receiving matched with audio heard loudly via the SDR in Bonaire. Reception was generally poor to barely fair. Eric Fetters-Walp, Lake Stevens, Washington``
(Glenn Hauser, OK, WOR)

** WESTERN SAHARA. 711 kHz, Nov 25 at 0426, Canary SDR is getting a good signal here, presumed active the Moroccan imperialist hi-power outlet, and with a het, in this case likely TA from CUBA 710, reverse of what I hear direct (Glenn Hauser, OK, WOR) {also below, TA search}

UNIDENTIFIED. 383 & 385 kHz, at 0729 Nov 24, JBA MCW carriers: only two USA listed on 383, LB in LiBeral KS, and CNP in Chappell NE; but too many on 385, including AR, LA and TX. On Dec 5, 2021, I did log CNP but no sign of LB (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search, Nov 24 at 0259, full bandscan at 9 kHz intervals -1 kHz in USB, E/W loop into R75, hits only: 711 and 1044. 711 het to 710 still there at 0344. This fall I am having much less success than previous years, due to: increased constant local noise level; degraded MW prop at solar max; fewer signals on air at full power, notably Spain. 711 I hope is 300 kW WESTERN SAHARA as occupied by Morocco, but could be Cuban spoiler. At 1650 I try Canary remotes on 711: one gets nothing, the other a carrier but nothing audible, 9 Hz below 711 and no WWV to check calibration. 1044 likely SPAIN, where there are 2 x 10 kW, tho I would settle for 200 kW from ETHIOPIA, starting at 0245 per mwlist. Wish I could check for TPs around local sunrise, but gotta sleep sometime (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search, Nov 26 at 0432-0440 UT, jiggled a loose connexion on the Wellbrook loop cable, now this is more like it: 711, 774, 819, 855, 1044, 1098, 1107, 1125, 1134?, 1314, 1368? Likely mainly Spainly (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1141, Nov 25 at 0442 UT, carrier het to 1140s. Long assumed to be Cuban, but doubts were cast in NRC IDXD by ed. Bruce Conti; however, we can`t be positive a blackout in Cuba was 100%:
``1141 unID NOV 1 0800 - Loud het against 1140 WRVA. By 1000 UTC, barely above the noise floor but still there. NOV 3 0000 - Het against 1140 WRVA and CBI. Roy Barstow via RealDX reported receiving the 1141 kHz signal during the electricity blackout in Cuba, so this widely received offset frequency signal apparently isn't Cuba as had been previously presumed. Not from 1140 WQBA which is found on frequency via the Boca Raton KiwiSDR. Not 1140 WVVO Viva FM on frequency via the Melbourne SDR. 1140 ZP22 Central Radio strong and on frequency via Paraguay SDR. Nothing on 1140 or 1141 daytime via Bonaire SDR, only a strong YVRL R. Ideal signal on 1130 kHz. Ecuador SDR not connecting. Colombia, Peru, and Puerto Rico would be logical suspects if not Cuba. [Conti-NH]`` (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 4535, Nov 24 at 0320, rapid CW ID as CODAR pulsing

pauses, as I happen to be tuned here in bandscan; a reminder that this happens at :00, :20 and :40 when one should be prepared to copy or record (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 5025, Nov 25 at 0305, JBA carrier, gone at 0321. Either Rebelde gave up or it were R. Quillabamba, PERU (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9167-9212 approx., Nov 23 at 0740, very strong multi-carrier, multi-tonal broadband signal, what is this? Same sound heard at 0739 down to 7675, but cut off before I could find the upper limit, tuning down from 7730 WRMI. Listening in AM, it`s more or less a constant pitch tone (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9490, Nov 23 at 0743, open carrier of S6/S8. This is during the English hour from TIBET, but unlikely that. Maybe France, Philippines, Bulgaria, Taiwan, or Turkey testing instead of own far different scheduled hours (Glenn Hauser, OK, WOR)
